Preferring to work remotely

### Report

- 1-The response of employees regarding their Recommending to work remotely for the last 3 months, compared to last year in 2020, was 37% who strongly agreed, and approximately 37% also agreed to somewhat.
  - 2- The largest number of employees, 22.2%, prefer to spend 100% of their time working remotely, followed by 12.1%, who prefer to spend 50% of their time.
  - 3- Productivity was not affected, according to the employees' evaluation, 29%, which is the largest number, answered that their productivity is the same as before, followed by 14.6% who answered that their productivity increased by 50%.
- Which means that working remotely has a positive impact on productivity and the amount of work completed, and this indicates that Organizations are expected to encourage more work remotely.**
- 4- The time spent working remotely in personal life and family was slightly greater, 3.5 hours, compared to working from the workplace, 2 hours.
  - 5- The biggest barrier for employees to working remotely was the feeling of isolation and /or left out, 25.6%, followed by difficulty in collaboration, 18.12%, which indicates the importance of employers supporting employees and maintaining constant contact with them in working remotely.
